WAH for Hospitals (WAH4H) — Hospital Information System				
KEY PARTNERS	KEY ACTIVITIES	VALUE PROPOSITIONS	CUSTOMER RELATIONSHIPS	CUSTOMER SEGMENTS
• WAH Organization — project sponsor & Proxmox server owner • Asia Pacific College — academic framework & oversight • Sir Robert Michael Martinez — WAH server & deployment manager • PhilHealth — eClaims regulatory compliance body • Cloudflare — DDoS protection & tunnel access (\$20/mo existing service) • LGUs (governors & mayors) — target institutional audience for demo • Philippine DOH — FHIR R4 & ICD-10-PH regulatory authority	• Containerize PBL1 codebase via Docker Compose; deploy on Proxmox VE • Execute 3-tier pipeline: Local → Sandbox → Production • Integrate PBL2 modules: Admin, Appointments, eClaims • Implement JWT authentication, RBAC (7 roles), and audit logging • Align database schema with PH Core FHIR R4 across all 11 modules • Conduct UAT with Miss Anna Katrina Yturralde (sign-off authority) • Deliver Training, End-User, and Technical Manuals • Execute runbook training; formal sign-off (Anna → Sir Pey Canlas)	• PH Core FHIR R4-compliant, demo-ready HIS on WAH's sovereign Proxmox server • Complete 11-module clinical coverage: registration through eClaims • Eliminates ₱97,632/year cloud hosting cost via on-premise Proxmox deployment • Bridges regulatory compliance gaps: PhilHealth eClaims, RA 10173, RA 11223 • No vendor lock-in — full documentation enables WAH to operate independently • Government-presentable demo to unlock LGU institutional buy-in and funding	• Collaborative development with Anna Katrina Yturralde (UAT) and Sir Myk (infrastructure) • Day-to-day coordination via Ma'am Nicky Balderosa; escalation to Sir Pey Canlas • Operational: Messenger for rapid comms; Email for formal approvals & sign-offs • Post-handover: clean capability transfer — no ongoing support relationship • Manuals enable WAH to train staff and manage infrastructure independently	• WAH Organization — primary beneficiary; needs demo-ready HIS for LGU presentation • Hospital clinical staff (7 roles): admin, doctors, nurses, pharmacists, lab techs, billing, reception • WAH IT Team (Sir Myk) — infrastructure management post-handover • LGU officials — evaluate system & commit deployment funding • APC faculty — evaluate professional PM & software engineering deliverables • Future: patients in underserved Philippine communities served by WAH hospitals
	KEY RESOURCES • PM: Elijah Josh R. Quibin Lead Dev/DevOps:		CHANNELS • Cloudflare Tunnel — secure HTTPS access for	

	Jhon Lloyd Nicolas • QA: Mariyah Vanna Monique C. Chavez Scrum Master: John Kenneth L. Jajurie • WAH Proxmox Server — 16GB RAM, 320GB, 8 CPUs; sole deployment platform • Cloudflare Tunnel — \$20/mo; secure external access for government demos • PBL1 Django/ReactJS codebase — foundation containerized and extended • PH Core FHIR R4, PhilHealth eClaims, ICD-10-PH, LOINC, SNOMED CT, MIMS PH, RVS		WAH staff & government demos • Direct LAN — on-site fallback for presentations • Messenger — day-to-day WAH coordination • Email — formal documentation delivery, UAT sign-offs, milestone approvals • On-site runbook training sessions at WAH facilities • 3-manual package + source code repository handover to Sir Myk	
COST STRUCTURE • Simulated labor: ₱185,158.50 (Elijah ₱594/hr, Jhon ₱625/hr, Mariyah ₱363/hr, Jajurie ₱309/hr) — WAH assumes ₱0 liability • Recurring OpEx (WAH-managed): Cloudflare \$20/mo (₱13,560/yr) • Cost avoided: ₱97,632/yr — Proxmox eliminates cloud hosting dependency • Reference total (labor + 1-yr infrastructure): ₱296,350.50		REVENUE STREAMS • LGU institutional funding — demo secures government buy-in for full production deployment • DOH grant eligibility — FHIR R4 & RA 11223 compliance unlocks public health funding • PhilHealth reimbursements — automated eClaims reduces billing errors & delays • Admin cost reduction — estimated 40% less time on clinical admin workflows • ₱97,632/yr savings — on-premise Proxmox vs. equivalent cloud hosting • Training self-sufficiency — manuals enable WAH to train all future staff internally
